

R M DIVYEN

Frontend Developer, UI Designer

Aspiring Frontend Developer specializing in React.js and modern web technologies, dedicated to building seamless and user-centric applications. Skilled in responsive design, interactive user interfaces, and performance optimization. Committed to continuous learning, problem-solving, and delivering innovative software solutions that enhance user experiences

Educational Background

Bachelor of Technology (B.Tech) in Information Technology

R. M. K Engineering College
2024 - 2028

Projects

MedAI Health Assistant — AI-Powered Symptom Analyzer & Health Companion

React.js, Node.js, Express.js, Supabase, Groq API (LLaMA 3.1)

- Developed a full-stack AI healthcare web application for symptom analysis, vitals tracking, medication management, and AI-powered health assistance.
- Integrated Groq LLaMA 3.1 API to provide real-time symptom-to-condition prediction with severity assessment, self-care guidance, and emergency recommendations.
- Built a secure backend using JWT authentication and Supabase (PostgreSQL) for persistent data storage, with localStorage fallback support for offline functionality

PREPMATRIX AI — AI-Powered Study Planner

React.js, Express.js, MongoDB, Groq AI (LLaMA), Vite

- Developed an intelligent AI-driven study planner that generates personalized timetables, tracks chapter-wise progress, and provides adaptive learning recommendations.
- Implemented features including an AI chatbot, quiz engine, resource hub, PDF report generation, gamified progress tracking, streak rewards, and a productivity focus timer.
- Designed a modern glassmorphic user interface with dark/light themes, customizable accent colors, and fully responsive layouts for seamless cross-device accessibility
